PROFESSIONAL SUMMARY

AI Automation and Software Developer with an Electronics Engineering background and hands-on experience building AI-powered workflows, web applications, API integrations, and business process automation. Experienced with n8n, Python, JavaScript, Node.js, React, Firebase, REST APIs, webhooks, AI agents, and LLM integrations. Built multi-step automation workflows for data extraction, AI analysis, email and messaging automation, API-driven data processing, and business reporting. Experienced in translating manual processes into practical automated systems, testing workflows, troubleshooting integrations, and developing maintainable technical solutions.

KEY SKILLS

Web Development | React | JavaScript | Python | Firebase | n8n Automation | Artificial Intelligence Tools | Technical Support | Computer Networking | Hardware Troubleshooting | System Diagnostics | Embedded Systems

PROFESSIONAL EXPERIENCE

AI Automation & Workflow Developer — Freelance

Project-Based | Remote | 2025 – Present

- *Designed and developed business automation workflows using n8n, AI models, APIs, webhooks, and third party integrations.*
- *Built multi step AI workflows for data processing, information extraction, summarization, automated responses, reporting, and notifications.*
- *Integrated external platforms, databases, email, messaging services, Google Workspace, Airtable, and other business tools into automated workflows.*
- *Developed AI agents using large language models such as OpenAI, Gemini, and Claude for analysis, classification, content processing, and decision support.*
- *Worked with REST APIs, JSON, webhooks, structured outputs, conditional logic, and data transformation across automation workflows.*
- *Tested, debugged, and optimized n8n workflows to improve reliability, accuracy, and error handling.*

Web Development and Automation

Philippine Red Cross, Mandaluyong City | 2026

- *Developed a web based performance and data management system to replace an existing spreadsheet based workflow.*
- *Built automated calculations for daily, weekly, monthly, annual, total, and percentage based performance metrics.*
- *Developed configurable KPI dashboards, reporting period filters, and centralized operational data tracking.*
- *Added reporting, data backup, and downloadable export functionality for documentation and record keeping.*
- *Developed responsive interfaces and reusable components using React and Vite.*
- *Performed application testing, troubleshooting, data validation, and feature improvements.*

Audio Annotator

DataForce, CARDAMOM Project | 2025

- *Annotated and labeled audio data used to support Artificial Intelligence and Machine Learning model development.*
- *Performed transcription, segmentation, and quality checks to produce clean and structured datasets.*
- *Collaborated with the Quality Assurance team to review annotations and resolve inconsistencies.*
- *Followed detailed project guidelines while maintaining accuracy and consistency across large volumes of audio files.*

Print Production Manager

SPCT Printing Services | 2023 to 2025

- *Managed day to day print production while maintaining quality and consistency across customer orders.*
- *Coordinated directly with clients to understand requirements and ensure finished products met expectations.*
- *Conducted quality control checks to maintain color consistency and production quality.*
- *Reviewed and proofed job orders before securing client approval for production*

TECH PROFICIENCY

Programming and Web Development: *Python, JavaScript, React, Vite, HTML, CSS, Google Apps Script*

Productivity and Business Tools: *Microsoft Office, Word, Excel, PowerPoint, Teams, Google Workspace, Docs, Sheets, Drive, Forms, Meet*

Database and Application Services: *Firebase, Database Management, Authentication, Application Data Handling*

AI & Automation: *n8n, Zapier, ChatGPT, Claude, Gemini, Grok, Perplexity, Veo, Artificial Intelligence Assisted Development, Workflow Automation*

IT and Networking: *Computer Networking, Data Communications, Technical Support, Software Installation and Configuration, System Diagnostics, Hardware Troubleshooting*

Embedded Systems and Electronics: *Arduino, ESP32, ESP8266, Microcontroller Programming, Circuit Design, Embedded Systems, Electronics Troubleshooting*

Engineering and Design: *AutoCAD, Technical Drawing, 2D Drafting, 3D Modeling, Technical Documentation*

EDUCATION

Bachelor of Science in Electronics Engineering

New Era University | Quezon City, Philippines | 2026

SEMINARS AND PROFESSIONAL DEVELOPMENT

- **Facilitator**, "MATH Iupitang Calculator Technique: Turning Calculator into Your Secret Weapon for the Board Exam"
New Era University, Quezon City | March 13, 2026
- **[Facilitator]**, "Classroom to Corporate: Diploma Earned. Reality Unlocked: Bridging Education to Industry"
New Era University, Quezon City | April 24, 2026

REMOTE WORK READINESS

Internet: *[600 Mbps High Speed Fiber Internet| Backup: Globe 5G Hotspot]*

Power Backup: *Backup power available for continuous remote work*

Equipment: *AMD Ryzen 5 Processor | AMD Radeon RX 590 Graphics | 16 GB RAM | Personal Computer | Additional Monitor | Webcam | Headset | Microphone*

Workspace: *Dedicated Home Workspace | Quiet Work Environment | Professional Video Call Setup*

Availability: *Full Time | Open to International Schedules and Remote Work*

LANGUAGES

English: *Professional Working Proficiency*

Filipino: *Native*
